Personal Statement

As a Grade 11 student in the International Department of Shanghai Datong High School, I have built a solid interdisciplinary knowledge foundation through a rigorous and diverse international curriculum, while cultivating independent thinking and critical analysis skills. I maintain a strong curiosity for the unknown, actively exploring complex issues through cross-cultural academic perspectives and engaging in independent research to deepen my scholarly understanding. Beyond academics, I have developed my comprehensive abilities through various extracurricular activities and social practices, honing my teamwork and problem-solving skills in real-world contexts.

Education

Shanghai Datong High School (International Department) Sep. 2024 — Present

Grade: 11

Core Courses: Pursuing a rigorous AP curriculum with emphasis on STEM and Economics, while maintaining high standards in humanities. Simultaneously completing domestic curriculum requirements for a dual-course program.

Standardized Test: TOEFL 103

AP Core Scores:

Perfect Scores (5): AP Microeconomics, AP Macroeconomics, AP Calculus BC.

High Scores (4): AP Statistics, AP Physics C: Mechanics, AP Physics C: Electricity & Magnetism, AP Computer Science A.

Academic Enrichment & Challenges:

- Participated in the AMC (American Mathematics Competition) and ACSL (American Computer Science League), broadening my academic horizons.
-

- **Interdisciplinary Inquiry:** While maintaining excellent grades across all subjects, demonstrated strong intellectual curiosity by serving as group leader and presenting research projects in multiple classroom studies.

Shanghai High School East Campus (Junior High) Sep. 2020 — Jun. 2024

Academic Achievement: Completed junior high studies with outstanding results, demonstrating consistent academic potential.

Comprehensive Qualities & Specialties:

- **STEM Innovation:** Passionate about engineering and programming, actively participated in various robotics competitions during junior high, earning first prize in the National Robotics Competition (Building Category) and other honors, demonstrating exceptional logical thinking and hands-on ability.
- **Artistic Cultivation:** Focused on aesthetic appreciation and creativity, excelled in the arts with awards including first prize at the MeiYuan Cup national competition, achieving a balance between rational thinking and expressive artistry.

Awards & Honors

- Sep 2023 Received "Outstanding Work" Honor, People's Art Youth 2023 Art Creation Activity
- Feb 2024 Gold Award, MeiYuan Cup National Children's Painting & Calligraphy Exhibition
- Mar 2024 comic Level 6
- Jun 2024 Gold Award, International Children's Art Competition
- Mar 2025 Received "Outstanding Youth" Honor, China Manned Space Knowledge Science Popularization Action
- Jun 2026 Scored 37/40 (out of 40) in the ACSL American Computer Science Competition
- Jul 2026 comic Level 8

Extracurricular Activities & Social Practice

- Aug 2024 Participated in "MeiYuan Cup National Youth & Children Art Exhibition"
- May 2025 — Oct 2025 Participated in Friendship Ambassador Training Camp
- Jul 2025 Participated in UCLA "Game Lab" Summer Program
- Dec 2025 Participated in "2025-2026 Intangible Cultural Heritage Co-creation for the Future · World ICH Inheritor Conference Global Art Invitation Competition"

Invention Patents

1. A Water Surface Floating Object Collection Boat (Application No.: 202610098475.1, Jan. 2026)

This patent designs a boat capable of automatically collecting floating objects from the water surface, involving the structural design of the hull, collection mechanism, and power system to improve cleaning efficiency.

2. A Scooter (Application No.: 202210710034.4, Entered Substantive Examination Mar. 2024)

This patent involves a technological innovation for a scooter, focusing on improvements to its structure or functional components to enhance user experience or performance.

Self-Evaluation

A passionate explorer at the intersection of STEM and the arts, dedicated to pursuing innovation and breakthroughs in interdisciplinary fields. Through rigorous academic training, I have developed critical thinking and complex problem-solving abilities, while long-term artistic practice has shaped my unique aesthetic perspective and creativity. I look forward to leveraging my diverse background as a driving force for continued exploration on a higher academic platform, and collaborating with outstanding peers to push the boundaries of knowledge.
